HOW TO PLAY COOKIE COLLECTOR

1. BASIC CONTROLS

The keys that are used are (w)(s)(a)(d)(ESC)

A. Heading 2

- i. To move forward press w
- ii. To move backwards press s
- iii. To move left press a
- iv. To move right press d
- v. To exit press (ESC)

2. ENTITIES

- I. The cookie. The cookie is a brown cookie- like entity that moves around the map. If you get close to it will run away from you. It is slower than you though and you can hunt it down easily. The game starts out with 20 cookies on the map but you can buy more in the shop. When a cookie dies you receive 1 of the currency “cookie” and the Cooke reappears elsewhere.
- II. The evil cookie. The evil cookie is a larger reddish cookie with horns and an angry face. This cookie normally stands still but if you get close to it will chase you. This cookie is slower than you, but if you touch it, you die.
- III. The shop. The shop is a place near the center of the map. It is where you spend you hard earned cookies for power-ups. To enter the purchase screen simply touch the shop. Then you will see 4 buttons. These power-ups are self explanatory, and to find the price of one simply hover over the button. To go back press back.

A smaller version of this can be found in-game by pressing help on the main menu.
